Mobile Power Generator with Accessory

The Mobile Power Generator generates sinusoidal supply voltage of 230V or 115V with a frequency of 50 Hz from a 12V/7.2Ah lead acid battery and makes this available on one or two sockets (master and slave). Applications are for example: Operation of flash units (up to 1x500Ws and 1x1000Ws), laptop computers, charging of batteries (i.e. of mobile phones, digital cameras).
